	₿,	On 7 June, construction work on the KVP barracks installation in Hohenstuecken which had been conducted by the Bauunion Brandenburg was suspended on orders of the Ministry of the Interior. One barracks building and a cultural building had been under construction. Bauunion Brandenburg also received order to vacate the site. Source was told that the project would be taken over by a special Bauunion for VF buildings
25X1A 25X1A	1.	Comment. The former vocational school of the German railroads on Buerger-heim Strasse was occupied by the KVP komendatura in Gross-Berlin under Lieutenant Colonel Arm. See
25X1A	2.	Comment. KVF was reported for the first time in Blumberg. The headquarters of a border alert unit of the Ring um Berlin was previously reported located in Blumberg. Border police, however, has green service color rather than blue service color. KVF infantry has red service color. The blue service color seen tends to indicate that tank and mechanized troops (mechanized infantry) was concerned. It cannot be determined from what place these troops came.
25X1A	3.	Comment. KVF offices located in Dresden include the headquarters of TV 3000 and an artillery school on Dr Kurt Fischer Allee and the officers' school for tactics on August Bebel Strasse.
25X1A	Es.	Comment. The Kluever Kaserne quarters a signal officers' school of the KVF whose cover designation is unknown. Deserters stated that this school would move to the Reil Kaserne.
25X1A	5.	Comment. The cadre unit located at this barracks installation until April 1953 was probably deactivated and was distributed to newly established units of TVs 5000, 6000 and 3000.
